Subject: Spam : FW: Orthoxylene into India: Offer from Tricon

Dear Sir,

Tricon is offering at 1420 Chennai for Feb, Mar loading -- \$40 more than present platts SEA. Per our prediction model OX should be b/w 1396 to 1451 in Feb-March (after the dip in Jan).

Tricon has a 3000 MT per month off-take agreement with Total Gonfroville for 2014.. the material could likely be from Total.. will confirm tonight. Total is unable to quote directly – can quote only in March, only if material is avbl -- presently there is an avblity problem due to strike.

Tricon also has a contract with PTT Thailand and supplies into China from EU and RIL. They've supplied to IG earlier. He says the quality meets our spec -- have asked for it.

The spot market probably works on fixed price, rather than platts as I'm beginning to understand.

These apart: When I spoke last night, found him rather honest/ straight-forward, as opposed to Mitsui -- where I am never quite sure..

Have explained to him about low flash restriction at Chennai port – they will likely unload their main cargo (PX for RIL?) at Mumbai and bring the ship to Chennai. Shall I indicate that demurrage will not be bearable by TCL, and also bid at 1380 - 1400 when I talk tonight -- since PX also has been falling.

Regards,

Mark
